

MP28167-A

2.8-22V V_{IN} , 3A I_{OUT} , 4-Switch, Integrated Buck-Boost Converter with FB Pin

PRELIMINARY SPECIFICATIONS SUBJECT TO CHANGE

DESCRIPTION

The MP28167-A is a synchronous, 4-switch, integrated buck-boost converter capable of regulating the output voltage from a 2.8V to 22V wide input voltage range with high efficiency. The integrated output voltage scaling and adjustable output current limit functions meet the USB power delivery (PD) requirement.

The MP28167-A uses constant-on-time (COT) control in buck mode and constant-off-time control in boost mode, providing fast load transient response and smooth buck-boost mode transient. The MP28167-A provides auto PFM/PWM or forced PWM switching modes, programmable output constant current (CC) current limit, which supports flexible design for different applications.

Full protection features include over-current protection (OCP), over-voltage protection (OVP), under-voltage protection (UVP), programmable soft start, and thermal shutdown.

The MP28167-A is available in a 16-pin QFN(3mmx3mm) package.

FEATURES

- Output Voltage Programmable Via FB Pin
- Wide 2.8V to 22V Operating Input Voltage Range
- Reference voltage range is 0.08-1.637V with 0.8mV Resolution through I2C⁽¹⁾ (Default 1V reference voltage)
- 3A Output Current or 4A Input Current
- Four Low $R_{DS(ON)}$ Internal Buck Power MOSFETs
- Adjustable Accurate CC Output Current Limit with Internal Sensing MOSFET via I²C
- 500kHz/750kHz Selectable Switching Frequency
- Output Over-Voltage Protection (OVP) with Hiccup
- Output Short-Circuit Protection(SCP) with Hiccup
- Over-Temperature Warning and Shutdown
- I²C Interface with ALT Pin
- One-Time Programmable (OTP) Non-Volatile Memory
- I²C Programmable Line Drop Compensation, PFM/PWM Mode, Soft Start, OCP, OVP, etc.
- EN Shutdown Discharge Programmable
- Available in a QFN-16 (3mmx3mm) Package

APPLICATIONS

- USB PD Sourcing Ports
- Buck-Boost Bus Supplies

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS" and "The Future of Analog IC Technology" are registered trademarks of Monolithic Power Systems, Inc. or its subsidiaries.

NOTE:

- 1) For $V_{OUT} < 3V$ applications, the switching frequency decreases.

TYPICAL APPLICATION
