MAG10 Magnet for end-of-shaft angle sensing

FEATURES

- Magnet for precise angle sensing
- Suitable for MagAlpha sensor family
- Optimized for end-of-shaft configurations

ORDERING INFORMATION

Part number: MAG10-X M-DD.DD.DD

Dimensions in 0.1 mm: outer diameter, inner diameter (if any), height

Shape code: M = C,R,B

Material code: X = 1,2,3

</table>

(1) Dimensional tolerances: ±0.05 mm for all NdFeB magnets
(2) To achieve a field above 30 mT
(3) To limit the excess error at 0.5 deg. Assuming 5 deg tilt between sensor and magnet/magnetization.
