

DESCRIPTION

The EV2695-Q-01A is an evaluation board for the MP2695, a high-integrated, flexible switch-mode battery charger.

The MP2695 integrates full feature battery charging profile by three phases: pre-charge, constant current and constant voltage charge. This device also manages input power source by input current limit regulation and minimum input voltage regulation.

All the parameters and control can be easily accessed via the I2C interface.

ELECTRICAL SPECIFICATION

Parameter	Symbol	Value	Units
Input Voltage	V _{IN}	4-11	V
Input Current Limit	I _{IN}	0.1-3.0 Programmable	A
Charge Voltage Regulation	V _{BATT_REG}	3.6-4.45 Programmable	V
Charge Current	I _{CC}	Up to 3.6 programmable	A

FEATURES

- 4.0V to 11V Operation Voltage Range
- Up to 16V Sustainable Input Voltage
- 500mA to 3.6A Programmable Charge Current
- 3.6V to 4.45V Programmable Charge Regulation Voltage
- 100mA to 3A Programmable Input Current Limit
- Minimum Input Voltage Loop for Maximum Adapter Power Tracking
- Comprehensive Safety Features
 - Fully-customizable JEITA Profile
 - Charge Safety Timer
 - Input Over-voltage Protection
 - Thermal Shutdown
- Analog Voltage Output IB pin for Battery Current Monitor
- Status and Fault Monitoring

APPLICATIONS

- Sub-Battery Applications
- Power-Bank Application

All MPS parts are lead-free, halogen free, and adhere to the RoHS directive. For MPS green status, please visit MPS website under Quality Assurance.

"MPS" and "The Future of Analog IC Technology" are Registered Trademarks of Monolithic Power Systems, Inc.

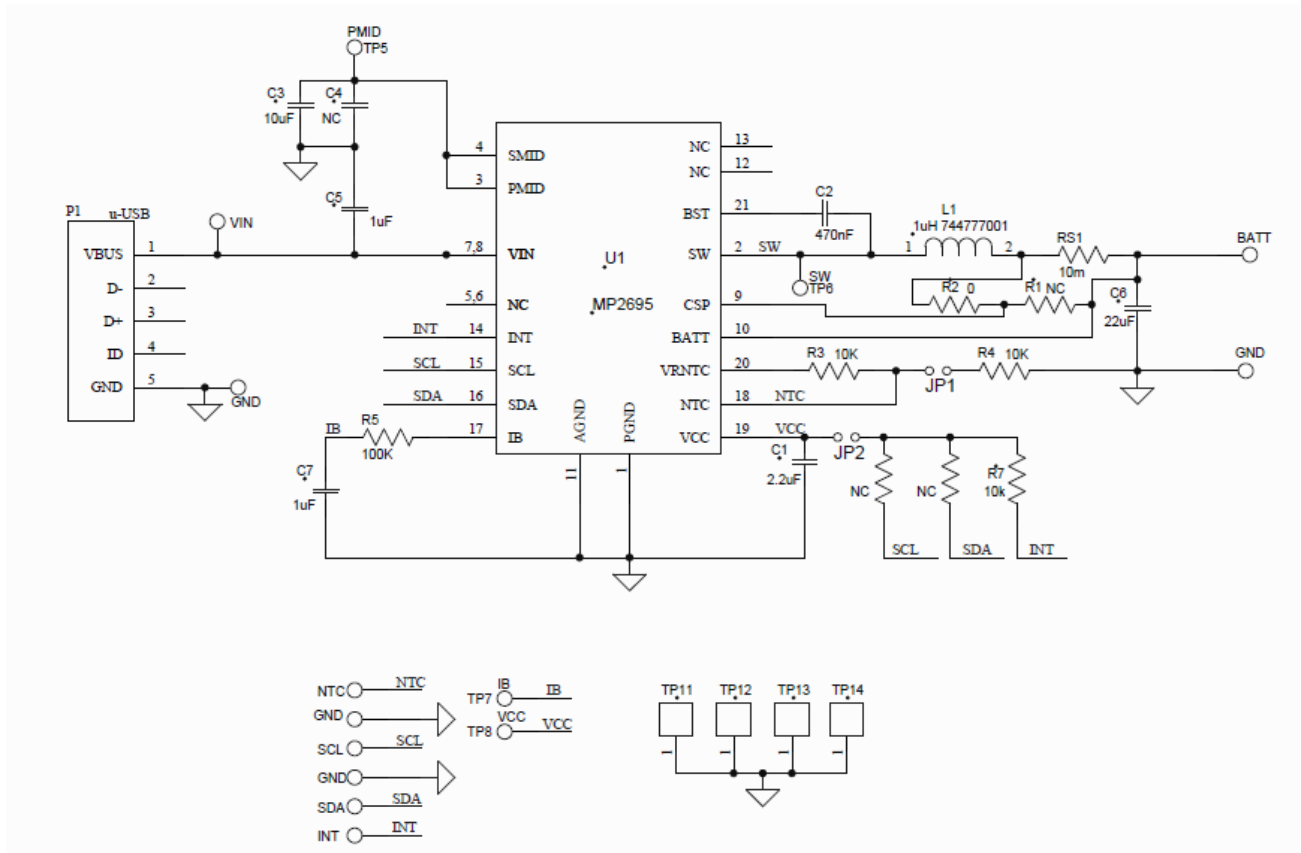

EV2695-Q-01A EVALUATION BOARD

(L x W x H) (6.35cm x 6.35cm x 1.2cm)

Board Number	MPS IC Number

PRINTED CIRCUIT BOARD LAYOUT

CONNECTIONS:

Table 1: Connectors

Connectors	Description
TP1/BATT	Connect to battery pack positive terminal
TP2/GND	Connect to battery pack negative terminal
TP3/VIN	Connect to input source positive terminal
TP4/GND	Connect to input source negative terminal
P1/micro USB power input	Connect to input power adaptor
SCL/SDA/GND/INT	I ² C connector
NTC	Connect to external thermistor

Table 2: Jumpers and Shunts

Jumpers	Description	I2C dongle mode Default
JP1	Connect on-board NTC divider	Install
JP2	Connect the pull up 10kΩ resistors to VCC, for INT.	Uninstall

QUICK START GUIDE

1, Please install USB dongle driver on the computer, and connect the dongle to the SCL/GND/SDA connector on the EVM

Figure 1: Setup

- 2, Connect the battery pack to TP1/BATT and TP2/GND connectors, take care of that the battery positive/negative terminal must be connected correctly.
- 3, If using a battery emulator, preset the battery emulator to 3.8V/5A and turn off the emulator, connect to TP1/BATT and TP2/GND, then turn on the emulator output.
- 4, Verify the USB dongle successfully connects the MP2695 to the computer (no warning shows on the top of the GUI).

(1) abnormal connected - warning in red

(2) normal connection

Figure 2: GUI Connection

5, Plug in the input adaptor to P1/micro USB port, or connect input power source 5V/3A to TP3/VIN and TP4/GND terminal. The EVM would start charging the battery.

6, Now the charging parameters can be controlled by the GUI interface.
