

## DESCRIPTION

The MP5016 is a protection device designed to protect circuitry on the output from transients on input. It also protects input from undesired shorts and transients coming from the output.

At startup, inrush current is limited by limiting the slew rate at the output. The slew rate is controlled by DV/DT pin setting and MODE pin setting.

The maximum load at the output is current limited. The magnitude of the current limit is controlled by an external resistor from ILIMIT to GND. There is a fixed 2.5A current limit when floating ILIMIT pin.

The output voltage is limited by output OVP function, the clamp voltage can be set by MODE pin connection.

The device is available in a QFN10 (1.5mm x 2mm) package.

## ELECTRICAL SPECIFICATION

Parameter	Value	Units
Input Voltage	2.7 to 15	V
Current Limit	2.5	A
DV/DT Slew Rate	3.8	V/ms

## FEATURES

- Wide 2.7V to 15V Continued Operating Input Range
- 26V Absolute Maximum Transient Input Voltage
- Selectable Over Voltage Clamp Threshold
- Fast Output OVP Response
- Integrated 43mΩ Power FET
- Adjustable Current-Limit or Fixed Current Limit when floating ILIMIT pin
- Soft Start Time Programmable through DV/DT pin and MODE pin
- Fast Response for Hard Short Protection
- OCP Hiccup Protection
- Thermal Shutdown and Auto Retry
- Available in QFN10 (1.5mmx2mm) Package

## APPLICATIONS

- HDD, SSD
- Hot Swap
- Wireless Modem Data Cards
- PC Cards
- USB Power Distribution
- USB Protection
- USB3.1 Power Delivery

## QUICK START GUIDE

1. Preset Power Supply to 2.7V-15V.
2. Turn Power Supply off.
3. Connect Power Supply terminals to:
  - a. Positive (+): VIN
  - b. Negative (-): GND
4. Connect Load to:
  - a. Positive (+): VOUT
  - b. Negative (-): GND
5. Turn Power Supply on after making connections. The board will automatically start up.
6. To use the Enable function, apply a digital input to the EN pin. Drive EN higher than 2.0V to turn on the regulator, or less than 1.6V to turn it off.
7. The default current limit is 2.5A (typical). To set different current limit, please choose proper R1. See details in MP5016 datasheet.
