## eMotion System™ Smart Motor Module

### Evaluation Kit

#### FEATURES

The **EVKT-MSM957188-36 evaluation kit** is part of a family of fully integrated smart motor solutions for servo motor applications. This 57mm (NEMA 23), 188W motor integrates a brushless DC motor and a smart motor module. The user can program the system to operate in speed control mode, position control mode, or torque control mode. Two control interface options are available: an RS485 interface and a PULSE/DIR interface.

Easy-to-use GUI software provides flexibility by allowing users to optimize the design online through the RS485 control interface. The parameters are saved in the motor module's non-volatile memory. A design guide for the GUI is available for download at [www.monolithicpower.com](http://www.monolithicpower.com).

The smart motor modules can be ordered separately for customization into different motor types. The **MMP757188-36** is the driver module part number used in the kit.

The datasheet for the **MMP757188-36** is available for download at [www.monolithicpower.com](http://www.monolithicpower.com).
