

EVM3650-QW-00A

17V Input, 5A, Step-Down Converter Module Evaluation Board

DESCRIPTION

The EVM3650-QW-00A evaluation board is designed to demonstrate the capabilities of MPS's MPM3650, a fully integrated, high-frequency, synchronous, rectified, step-down power module with an internal inductor. The MPM3650 offers a very compact solution to achieve 5A of continuous output current over a wide input voltage range with excellent load and line regulation. The MPM3650 offers synchronous mode operation for higher efficiency over the output current load range.

Constant-on-time (COT) control operation provides very fast transient response and easy loop design, as well as very tight output regulation. Full protection features include SCP, OCP, UVP, and thermal shutdown.
