

MPC12106-54-0750-0220

High-Efficiency, Fixed 4:1 Ratio, 800W Digital DC/DC Power Module

DESCRIPTION

The MPC12106-54-0750-0220 is a high-efficiency, non-isolated LLC-DCX power card module with a fixed 4:1 transformer turns ratio. The device operates from 40V to 60V DC primary bus and a 10V to 15V output voltage (V_{OUT}). It can deliver up to 800W of continuous power with a typical 54V input voltage (V_{IN}).

The built-in multiple-time programmable (MTP) memory can store and restore device configurations. The fault status, V_{IN} , V_{OUT} , output current (I_{OUT}), and temperature can be easily monitored via the digital interface.

The MPC12106-54-0750-0220 is available in a surface-mount (24mmx18mmx9.1mm) package.

FEATURES

- Supports Up to 800W Continuous Power
- Built-In Multiple-Time Programmable (MTP) Memory to Store Custom Configurations
- Monitoring for Input Voltage (V_{IN}), Output Voltage (V_{OUT}), Output Current (I_{OUT}), and Temperature
- Protections Including V_{IN} Over-Voltage Protection (OVP) and Under-Voltage Protection (UVP), V_{OUT} OVP and UVP, Thermal Design Current (TDC) Over-Current Protection (OCP), Over-Current (OC) Spike, and Over-Temperature Protection (OTP)
- Available in a Surface-Mount (24mmx18mmx9.1mm) Package

APPLICATIONS

- Data Centers
- DC Power Distribution
- High-End Computing Systems

All MPS parts are lead-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS", the MPS logo, and "Simple, Easy Solutions" are trademarks of Monolithic Power Systems, Inc. or its subsidiaries.
